PROFILE

Hey there! I'm Rama, I am a second year S.E student at Abu Dhabi university who loves juggling studies and my passion for food. When I'm not hitting the books or submitting assignments, I'm in the kitchen experimenting with simple, home-cooked dishes and desserts, nothing too fancy, just simple and delicious. I also love exploring cool spots and sharing my recipes on Instagram and TikTok. In the future, I hope to find balance in life by securing a WFH job where I can Work, cook, go to the gym, and travel the world whenever I want!

PROJECTS

Cooking Website
CSC 307 Course

FEB - 2025

- Developed a fully functioning cooking website that enables the user to scroll through various recipes.
- Included high quality images and videos to enhance the user experience.
- Utilized HTML, CSS, and JavaScript for the code writing.

Simple Shopping System
SWE 201 Course

NOVEMBER - 2024

- Created a simple shopping system that displayed options to buy from.
- The user can add as many items to the cart and then proceed with the checkout to view the final detailed bill.
- The system was done using java coding language only.

Property Valuation and Rent Assessment System
COE 102 Course

APRIL - 2024

- Developed an interactive dashboard that succeeded at providing precise property valuation and rental assessment.
- Our dashboard assures users that they can rely on accurate predictions that can support decision making.
